

Installation Guide

Overview

This guide provides step-by-step instructions to download and install the application, as well as information about system requirements based on the size of studies you wish to create.

Step 1: System Requirements

Recommended Specifications (for up to 200 packages):

- **Processor:** 12th Gen Intel® Core™ i7-12850HX @ 2.10 GHz
- **GPU:** NVIDIA GeForce RTX 3080 Ti
- **RAM:** 32.0 GB (31.7 GB usable)
- **OS:** Windows 10 Pro (64-bit, Version 22H2)
- **Experience Pack:** Windows Feature Experience Pack 1000.19060.1000.0

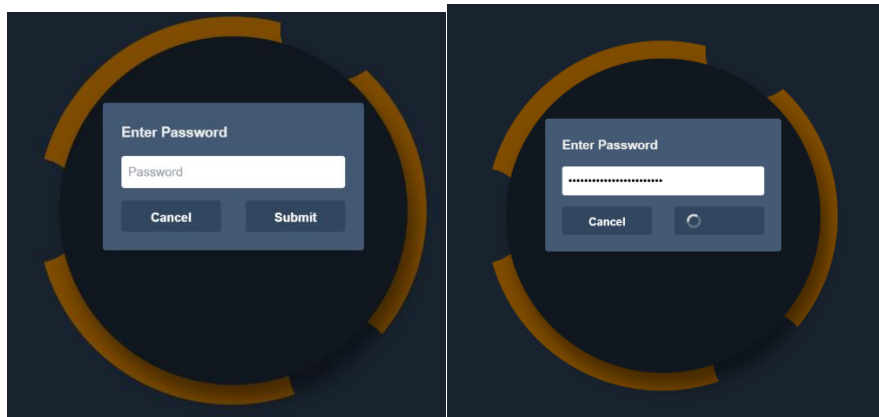

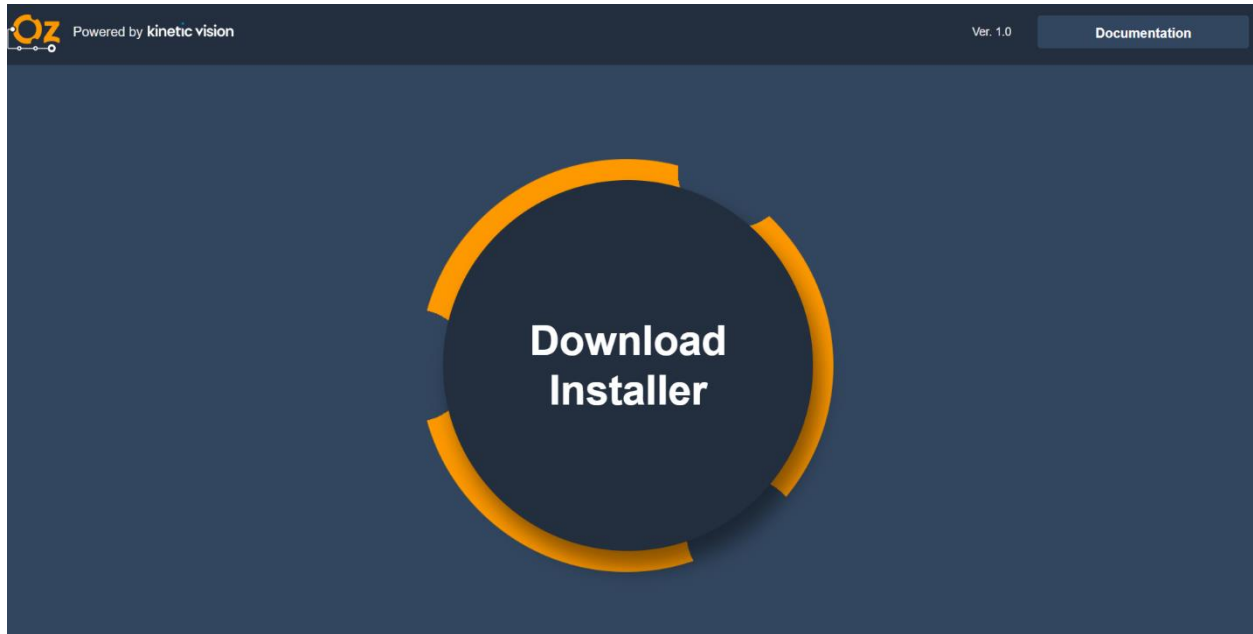

Minimum Specifications (for up to 100 packages):

- **Processor:** 12th Gen Intel® Core™ i7-12850HX @ 2.10 GHz
 - **RAM:** 32.0 GB (31.8 GB usable)
 - **OS:** Windows 10 Pro (64-bit, Version 22H2)
 - **Experience Pack:** Windows Feature Experience Pack 1000.19060.1000.0
-

Step 2: Download the Installer

1. Access the Download Link:

- The executable can be downloaded from here: <https://oz.amazon.k8s.kinetic-vision.com/>
- The password will be provided by the Kinetic Vision team. If you are having problems logging in contact ozsupport@kinetic-vision.com.
 - Navigate to the provided URL hosting the application installer.
 - Enter the required **password** to access the download link securely.

2. Download the Installer:

- File size: ~1 GB.
- Estimated download time: less than 2 minutes (depending on your internet speed).

Step 3: Start the Installation Process

1. Run the Installer:

- Locate the downloaded installer file.
- Double-click to launch the installer.

2. Accept the License Agreement:

- Read through the license agreement.

- Click **Accept** to proceed.
 - 3. **Select Installation Options:**
 - **Desktop Shortcut:** Choose whether to create a shortcut for the app.
 - **File Association:** Optionally associate Oz study file extension with the application.
 - 4. **Install Prerequisites:**
 - The installer will automatically unpack and install any required components, including Unreal Engine prerequisites and Power BI (if there is an older version or no Power BI installation already).
 - 5. **Reinstallation (if needed):**
 - If reinstalling, the installer will replace application files but will retain user-generated studies.
-

Step 4: Launch the Application

1. **Shortcut Access:**
 - If you created a desktop shortcut, double-click it to launch the app.
 2. **Start from Installation Directory:**
 - Alternatively, navigate to the installation folder and run the application executable.
-

Notes and Troubleshooting

1. **Power BI Installation:**
 - No separate download is required; the Power BI installer is included.
2. **Storage Requirements:**
 - Ensure sufficient disk space for both the installer (~1 GB), unzipped contents (5.5 GB), and application-generated files (can be over 1 GB in size depending on study parameters).
3. **Performance Notes:**
 - To work with studies larger than 100 packages, use the recommended system specifications to ensure optimal performance.
4. **Support:**
 - For issues during installation, contact ozsupport@kinetic-vision.com
